# Celebrating 75 Years of Analytical Excellence

Dear

I am pleased to invite you to read the first Anresco Email Newsletter to Clients issued in its 75 year history.

Anresco has much to write about as this is a very exciting time for the company. We have experienced recent growth in our FDA DWPE import sampling and testing, and still believe we are the best laboratory in the country for this work. We have increased the scope of our services, including the ability to test for glyphosate, mycotoxins, and heavy metals (via ICP-MS). We now also provide comprehensive testing capabilities to the cannabis industry, with all analyses required by the State of California already added to our ISO 17025 scope of accreditation. All in all, we hope and expect 2018 to be a banner year.

On a personal note, I am grateful for the efforts of my two children: Zachary Eisenberg (VP), who has taken over progressively more of the daily operations at the company; and Amanda Eisenberg

(Associate Director of Marketing), who has been critical in identifying new customers and markets for our analytical services. As Anresco transitions to a third generation, you can be secure in knowing the quality of our services will remain our first priority.

We have made great use of our 'state of the art' 13,500 square foot laboratory facility completed in 2014. The lab was our commitment to our clients, employees, and the City of San Francisco -- though it is possible that we may soon require additional space.

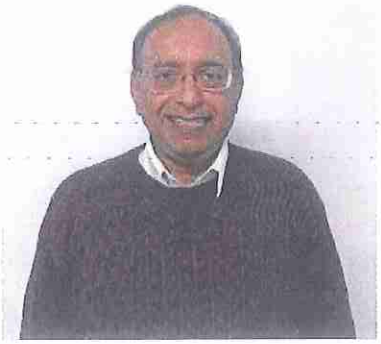
Thank you for your continued support. Please let me know if I can ever be of service.

With thanks.

David Eisenberg
President and CEO

## Meet Dr. Nayini

### Anresco's Food Safety Consultant



Anresco Laboratories now offers full-service consultancy services to help clients evaluate and validate key aspects of their food safety systems. Nari Nayini, PhD, is a registered Safe Quality Foods (SQF) Consultant with expertise in root cause analysis, establishing and reviewing Hazard Analysis Critical Control Points plans (HACCP), and guiding companies to prepare for and successfully meet SQF certifications

# FDA to Proceed with Obama Era Nutritional Labeling Changes

OLD NUTRITION LABEL NEW NUTRITION LABEL

In 2016, first lady Michelle Obama lead the reform to update the nutrition facts label displayed on packaged foods in an attempt to provide greater transparency to consumers. Major changes included the removal of Vitamin A and C from the mandatory label, and the addition of Potassium, Vitamin D, and Added Sugar, with enforcement expected to begin July 2018.

Following a 1 year delay, the FDA has now reaffirmed its commitment to these changes, extending the enforcement deadline to January 1, 2020 for manufacturers with $10 million or more in annual food revenue and January 1, 2021 for manufacturers $10 million or less in annual food revenue.

Anresco has performed nutritional labeling analyses since 1973 and has helped thousands of companies comply with FDA/USDA labeling regulations, using AOAC, FDA, USDA or equivalent recognized methods. Get a quote today and update your product's labels before the compliance deadline.
